STATEMENT OF PURPOSE

Adult Residential Care Programs provide 24 hour residential care settings for dependent adults. They are not medical facilities. Persons in need of constant medical care and supervision should not be admitted or retained in an adult residential care facility because such a facility lacks the staff and expertise to provide needed services. Persons who, by reason of age and or physical and/or mental limitations, are in need of assistance with the basic activities of daily living, can be cared for in adult residential care settings.

The information solicited in this medical evaluation will assist you, the individual, and the operator of an adult residential care facility in determining the level of care needed to assure the health, safety and well-being of the individual. It will become part of the resident's record and subject to review by the New York State Department of Health, which is responsible for supervision of Adult Residential Care Programs.
